Attached you will find a response from the Utah State Oil and Gas Board concerning the requested release of reclamation requirements at Cedar City.

I would suggest that we do not attempt at this time to categorize the percentage of revegetation involved. Certain areas will be difficult to appraise properly after a three-year period. For example, most of the alluvium property owned by McCahill, revegetated by us, is under grazing leases now held by Rex Murie. Also, many other areas are open range land that we just do not control (B.L.M.).

The State M-10 Rule and the three-year stipulation apparently are the present impasse to obtaining an immediate release.

Any response you may have would be appreciated.

Y. F. Jones
